

TSplus for Windows

With **TSplus**® for Windows, it's easy to publish your Windows applications and to access it from your Local Area Network or from Internet. Without touching a single line of code, you will instantly make your Windows applications accessible from any device, including IDP, Smartphone, MAC or PC workstations. Best of all, **TSplus**® is the fastest, simple and affordable solution that eliminates the complexity of other alternatives such as RDS (Windows Terminal Server) or Citrix Servers.

With **TSplus**, your Windows applications reside on a secure central **TSplus** system. Local and remote users running UNIX, Linux, Mac OS X, Windows and any mobile device simply connect using the Web Portal on any web browser. The application then appears on your device just as if it were running locally. And thanks to our high-performance client, **TSplus** provides a fast and efficient access.

TSplus Web Portal

Windows Applications Access Made Easy

- Provides instant access to Windows applications from any device or platform.
- Maintains 100% of the application's features, functions and branding.
- Eliminates the need for RDS or a Citrix Server.
- Publishes or Web-enables one or more Windows applications, or the entire desktop with a customizable Web Portal.
- Fully integrates itself with existing platforms and infrastructure.
- A cost-effective solution, based on a low cost concurrent user licensing model.

TSplus Remote Taskbar to start any remote applications in one click

Lowering Costs and Simplifying Management

Deploying and maintaining traditional distributed applications can be costly and time-consuming. **TSplus®** is the simple solution with easy user administration. Application issues can be solved at the central site, not at individual client desktops. And unlike our competitor's per-seat licensing, **TSplus®** is offered on a concurrent licensing basis.

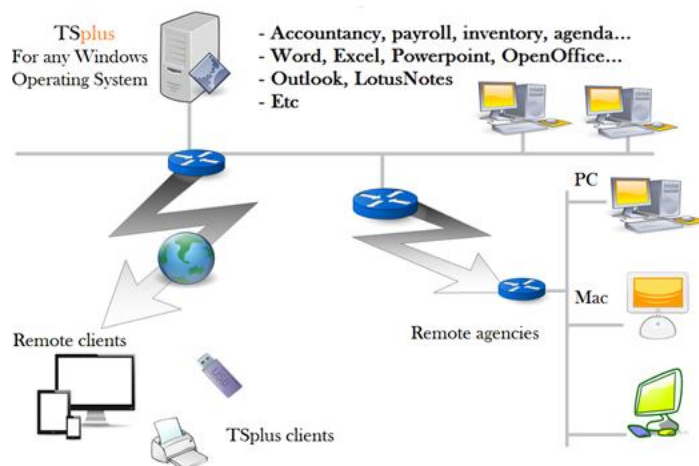

TSplus® supports a wide variety of client devices, such as heterogeneous desktops, Web browsers, mobile and wireless devices. **TSplus®** maximizes the value of your current Windows applications and leverages your existing management infrastructure investments. The net result is an outstanding ROI.

System environment

- Windows XP
- Windows 7
- Windows 8, 8.1
- Windows 10
- Windows 2003/2008/2012/2016
- 4 GB RAM
- 200 MB system disk space
- TCP/IP connectivity

Client.

- XP, W7, W8, W10
- Laptop, PCs or notebooks
- Thin-client device with one RDP client
- Mac OS X with RDP client or HTML5 Web client.
- Mobile/tablet/Smartphone devices with HTML5 client.

The Secure Solution

TSplus transmissions are fully encrypted using HTTP, HTTPS and RDP protocols.

Furthermore, using **TSplus®** Reverse-Proxy Gateway unique feature, your applications and mission-critical data remain secure on the server behind your corporate firewall. Only the user's interface with the assigned applications is transmitted to the client devices.

Advanced Product Features

- Server-centric solution with near zero-footprint clients.
- High performance over low-bandwidth connections.
- Secure operation using native server security.
- Complete cross-platform industry standards compatibility.
- Integrated load-balancing and failover.
- Universal printer driver, file access, and clipboard support.
- Automatic session reconnection and shadowing.
- Web Portal, Web Application Portal, Web Credentials, providing an easier access for your users.
